

Title: Software Engineer

Location: Overland Park, KS

Job Description: **JOB SUMMARY**

A **Software Engineer** at Creative Planning provides overall development support of internal systems, solves time-sensitive issues, and debugs problems. This role provides an opportunity for software engineers to work with a highly collaborative and engaging environment. It also requires working with our internal and external users.

The primary responsibility of the Software Engineer is to ensure that Creative has first rate reliability and stability and that all of the employee's needs are met quickly to keep everyone operational.

The selected applicant will be required to complete a satisfactory background check.

#### **JOB DUTIES**

- Develop and maintain console applications using Visual Studio
- Develop and maintain web applications without using Visual Studio
- Develop and maintain databases
- Test new and updated applications
- Document applications and processes
- Monitor the operation of applications and respond to problems by diagnosing and correcting errors using established programming techniques

#### **REQUIRED EXPERIENCE**

- Web/Application development
- API development
- Relational-database development
- Creative problem-solving skills
- Documentation skills
- Effective written and oral communication

- Attention to detail

#### **PREFERRED EXPERIENCE**

- VMware, Azure
- Windows Desktop and Server, Linux Server
- IIS, Nginx
- Visual Studio, Git
- SQL Server, SSMS, SSRS
- C#, PowerShell, JavaScript
- SSH, OpenPGP
- Salesforce
